

# Working Group on Toponymic Data Files and Gazetteers of UNGEGN

To respond to UN resolutions and UN data needs, this Working Group on Toponymic Data Files and Gazetteers addresses various issues of toponymic data processing, including the **creation, maintenance and outputs of toponymic data files** (including gazetteer production) and **aspects of toponymic data exchange formats and standards**.

Issues of providing **geographical names information** within **national and international spatial data infrastructures (SDIs)** through web (gazetteer) services and multipurpose toponymic database solutions in the context of SDIs as well as the utilization of **volunteered geographic information** and **crowd sourced data** are becoming more and more important. Furthermore, the issue of **appropriate definitions for gazetteers** and **data types and of general feature types/categories** relates with the **agenda of the WG TDFG**.

- **Work plan**
- **Actions for 2020 - 2022**
